

# COVID-19 PLANS

---

At the time of this publication it is impossible to project how the pandemic will impact us all in August. With that in mind, it is our plan to follow all the appropriate protocols and recommendations of the CDC, state agencies and the American Camping Association. We will continue to monitor information and updates coming from these organizations.

We know it will be particularly helpful if everyone coming to Camp RYLA 2021 has received a COVID-19 vaccine before arriving at camp (including drivers transporting students). One potential question for your applicants might be whether or not they intend to receive the vaccine when it is available to them. Currently we do not have any specific policies in place addressing vaccinations. More information will be forthcoming.
